Senior Full Stack Engineer

Experienced Senior Full Stack Engineer with expertise in customizing core products, developing new components, and managing full software development lifecycles. Skilled in Salesforce Apex, Lightning, ReactJS, and adept at effective communication of technical solutions.

WORK EXPERIENCE

Sitracker • Montclair, NJ **Sep 2019 - Jul 2024**

Senior Full Stack Engineer • Full-time

- Customized the core product and developed new components for clients in telecom, home building, EV charging, etc., using Salesforce Apex, Lightning, and ReactJS.
- Managed the full software development lifecycle for clients, ensuring effective communication of technical solutions through clear written and verbal explanations.
- Implemented a Salesforce to SharePoint integration, reducing manual labor for a client by 50%. Streamlined file uploads by syncing data between platforms.
- Transitioned to the core product engineering team, where I utilized Salesforce Apex and LWC front end to create an internal tool. Simplified object and field permissions navigation, reducing tasks that once took hours to minutes.
- Adopted a test-driven approach during each sprint, collaborating closely with the QA and DevOps teams to ensure a robust implementation of assigned tickets and bugs.

ForeFront • Fair Haven, NJ **Jan 2018 - Aug 2019**

Backend Engineer • Full-time

- Led backend development in a collaborative team of front-end developers for multiple B2B and B2C projects deployed via Salesforce Communities.
- Orchestrated end-to-end deployment processes, overseeing transitions from development environments to production.
- Wrote clear, concise, and unit-tested code, utilizing SOQL queries to fetch data from Salesforce databases. Implemented performant data structures and algorithms for efficient organization.
- Quantified impact: Successfully deployed numerous projects, ensuring seamless functionality and optimal performance.

SEMGeeks • Belmar, NJ **May 2017 - Jul 2017**

Web Development Intern • Internship

- Shadowed experienced web developers, gaining insights into industry best practices for web development.
- Independently developed Rotten Apples, a full-stack website utilizing the TMDb API for fetching TV show and movie information. Implemented MySQL for the CRUD operations of ratings and reviews.
- Strengthened proficiency in HTML, CSS, PHP, jQuery, and JavaScript through hands-on development and project implementation.
